## Facility Consultation, Design, & Installation

We are using our resources to help get your business ready to work in a covid-19 world. We are offering a full turnkey solution for facility barrier protection. Our solutions use existing products and custom solutions to provide protection for your staff and customers.

*Available in limited service areas, please call for more details.*

### OUR SERVICES INCLUDE

- Dedicated team of sales and technical support from start to finish.
- Our team will take all necessary measurements of your site.
- Our team will develop an installation plan using existing and custom components.
- Create drawing and samples for plan approval.
- Generate a turnkey project cost including delivery and installation.

We developed a product lineup of barrier products that are currently shipping. We also use the capabilities of our full service fabrication department to create custom solutions that may be needed for your environment.

### Planning & Layout

Our team will take measurements, photos, and consult with you to best understand your needs.

Our team will meet at your facility taking all appropriate safety precautions during our meeting.

### Budget & Proposal

We will work to keep your project on budget.

We will develop a thorough project overview outlining product used and how our products affect the overall cost.

### Schedule & Installation

Once approved we will confirm a timeline for production and installation of your solution. We will work with you and your staff to schedule a time that meets your needs. We will perform the installation professionally and safely adhering to current safety standards.

## BARRIER INSTALLATION & DESIGN

CUSTOM DESIGNED AND INSTALLED

Toppers that attach directly to existing office structures without damaging existing structure.
