

Screening Shield - Clear Polycarbonate

Our **SCREENING SHIELD** provides the perfect solution for safely screening visitors' before they enter your facility.

The shield is made from strong optically clear polycarbonate, which includes an open center slot to easily take the visitors' temperature. The frame is made from a strong lightweight aluminum extrusion which is easy to assemble and breakdown for a cost-effective shipping method. The four locking casters make this shield extremely portable.

Shown below is our stock design, however, we can customize to meet your specific needs. We pride ourselves on our quick turnaround and are your partner in meeting delivery timelines.

Strong shatter resistant polycarbonate is an excellent value and is preferred by many local fire marshals, compared to cheap acrylic which can easily shatter.

100% Made in the USA.

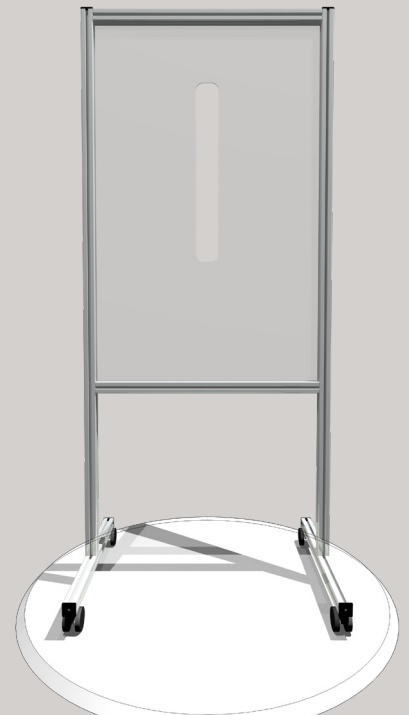

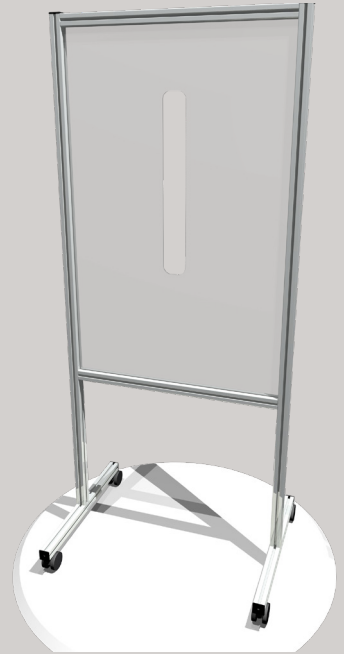

Quantity discounts available.

Shield made of optically clear strong $\frac{1}{8}$ " polycarbonate.

Polycarbonate is highly durable and more suitable for daily use compared to acrylic "Plexiglass".

The extruded frame and legs allow for the Screening Shield to be flat packed, for better shipping.

SCREENING SHIELD
